84.1%	\$331	\$279	45.2M	38M

The New York City market comprises ten total submarkets, with six in Manhattan and four in the outerlying boroughs of Brooklyn, Queens, the Bronx, and Staten Island. The largest of these is the Midtown West/Times Square submarket, with roughly 36,000 rooms, or approximately 6,000 more rooms than the second-largest submarket, Midtown South. The Uptown submarket features the highest RevPAR in the market, with a RevPAR that is generally \$80 higher than that of the second-best-performing submarket, Midtown East.

Through December 2025, RevPAR in the New York City market grew 4.5% over the past 12 months, which is significantly ahead of the 0.3% growth rate achieved nationwide. In line with most urban markets in the Northeast, RevPAR growth in the market was predominantly driven by significant gains in ADR rather than occupancy. ADR increased by 4.7%, to \$330 over the last 12 months, while occupancy marginally increased by 0.2% to 84.1% during the same period.

Hotels in the market continue to perform well, as hoteliers in New York have been able to drive weekend occupancy, which is up 1% over the same period last year, reflecting increased leisure demand. In addition, group RevPAR increased by 4.8% over the past 12 months, driven by a 7.4% rise in ADR, which suggests that the cadence of conferences, conventions, and meetings is returning to pre-COVID demand patterns.

Through the remainder of 2025, RevPAR growth is expected to decelerate to a slower growth rate of 0.4%, as occupancy is expected to remain flat and ADR growth

is projected to increase moderately by 1.6%. Weaker-than-anticipated economic growth remains a downside risk to the forecast.

Although supply grew at a compound annual growth rate of 3.6% between 2015 and 2019, the market has experienced a slower pace of development since the COVID-19 pandemic, with construction slowing down. According to market participants, a new zoning law enacted in 2021, combined with the difficulty in obtaining construction financing, has also hindered the development of new hotels in the market. As of December 2025, the market has 7,558 rooms under construction, which is nearly in line with the three-year average of 7,500 rooms, but is well below the 10-year average of 11,000 rooms. The JFK/Jamaica, Midtown West/Times Square, and Midtown South submarkets have the highest concentration of development.

Through December 2025, trading volume reached \$2.1 billion, up from \$1.3 billion during the same period in 2024. While trades in 2024 were concentrated in the upper upscale to luxury classes, trades in 2025 have shifted slightly down-market, with increasing investor interest in the upscale class. Additionally, over the past two years, sales have continued to be dominated by a diverse mix of local, national, and international investors. Looking ahead, industry participants anticipate the acceleration in investment volume in the closing months of 2025 to continue, driven by loosening credit conditions and expectations of further rate cuts by the Federal Reserve.

KEY INDICATORS

RevPAR	\$312	\$352	\$269	\$279	\$224	\$298
RevPAR Change	5.2%	4.1%	4.3%	5.3%	23.6%	2.4%

Through the first three quarters of the year, hotel performance in the New York market has boasted solid operating fundamentals, continuing to record robust RevPAR growth. Through December 2025, RevPAR grew 4.5% over the past 12 months, outpacing the performance of the U.S., most top 25 markets, and urban markets on the East Coast, such as Boston, Washington, D.C., and Philadelphia. Much of the market's performance can be attributed to the continued recovery of business and group demand, as well as heightened levels of leisure demand. It is worth noting that RevPAR growth in the market was driven by gains in ADR rather than occupancy.

As of December 2025, ADR has grown by 4.7% over the past 12 months. At these levels, 12-month ADR has now surpassed the pre-COVID peak of \$255 by nearly \$75. The New York City market benefits from a high concentration of hotels in the Upper Upscale and Luxury hotel classes, particularly in Manhattan. As a result, all six Manhattan submarkets feature ADRs that exceed \$300, with the highest-performing submarket, Uptown, achieving an ADR of over \$450. Year-to-date, weekday rates have increased 5.2%, while weekend rates have improved 4.5%. The surge in nightly rates has been fueled by the enactment of Local Law 18 and hoteliers' aggressive pricing strategies.

Association meetings and corporate groups, as well as corporate transient and leisure demand, have held up well. Year-to-date, weekend demand, which represents leisure demand, has increased by 1%. Meanwhile, weekday demand, which reflects business transient and group demand, has remained flat. Through December 2025, occupancy in the market reached 84.4%, which is roughly 3% below the pre-COVID peak of 87%. However, it should be noted that the market's inability to return to its pre-COVID occupancy can be primarily attributed to the delivery of over 26,000 rooms during the past decade, which has placed supply-side pressure on occupancy performance.

Although the New York market has performed well through the first three quarters, the outlook for the coming quarters remains positive, but moderation is expected to occur. RevPAR growth is forecasted to slow to 0.4% through the remainder of 2025. The slowdown in RevPAR is anticipated to be primarily driven by negative trends in hotel performance for submarkets outside of Manhattan, including JFK/Jamaica, LaGuardia/Queens North, the New York City Area, and East River-Queens/Brooklyn West. Conversely, continued gains within the borough of Manhattan are expected to propel the market to positive RevPAR growth through December 2025.

(1) For Annual P&L, the current year exchange rate is used for each year going back in time. This current year exchange rate is the average of all 12 monthly rates for that year.

(2) Percentage of Revenues for departmental expenses (Rooms, Food & Beverage, and Other Departments) are based on their respective departmental revenues. All other expense percentages are based on Total Revenue.

(3) Labor costs are already included in the operating expenses above. Amounts shown in Total Labor Costs are for additional detail only.

Higher borrowing costs, the steep increase in the price of materials, and labor shortages in the construction industry have been the leading causes of the slowdown in construction starts in most markets, but the New York City market has bucked national trends. New York is home to one of the largest development pipelines in the country, with 7,558 rooms under construction across the five boroughs. This equates to a 5.6% increase in supply to the existing 136,000 rooms, which is significantly higher than the nation's rate of construction, or 2.3% of the country's existing supply. However, following the delivery of the under-construction rooms, New York's pipeline is expected to slow, as under 3,000 rooms are in the final planning stage.

Several factors are impacting New York City's pipeline. Over 16,000 rooms were leased by non-governmental and governmental entities to house refugees, immigrants, and the unhoused. While some of these hotels may reopen once contracts expire, others may remain permanently closed. In June 2025, the city of New York signed a \$929.1 million contract with the Hotel Association of New York City Foundation to continue the program through June 2026.

In addition, the enactment of Local Law 18, which enforced strict guidelines on the operation of short-term rental units, has significantly reduced the number of units available in the city through platforms such as Airbnb. The decline in short-term rental supply has benefited hotel performance, especially during high-demand nights.

According to market participants, the 2021 passage of the "Citywide Hotel Special Permit" is also expected to negatively impact ground-up hotel development. The law requires developers to undergo the land use process, regardless of the current zoning, to build a hotel in any of the five boroughs, which could add between two and four years to the permitting process for a new hotel. As a result, supply growth is expected to be slow for the next few years.

Comments about future hotel casinos continue to make headlines as hotel and casino developers pursue one of three casino licenses expected to be announced by the end of the year. In June 2025, eight formal proposals for casino licenses were submitted to the state's Gaming Commission. As of December 2025, only three developments in the city are still under consideration: Metropolitan Park and Resorts World in Queens, and Bally's in the Bronx. A final decision regarding the awarding of the casino licenses is set for December 2025.

With nearly 2,600 rooms under construction, the Midtown West/Times Square submarket boasts the highest concentration of hotels currently being built, as New York's three largest under-construction hotels are also in the submarket. These include the 529-room Kimpton Rockefeller Center, which is scheduled to open in 2025; the 825-room hotel to be housed in The Torch, scheduled to open in 2027; and Atlas Hospitality's 424-room Voco, which is expected to open in early 2026.

Although tight debt markets and the high cost of borrowing relative to historical norms have resulted in slower hotel investment volume nationwide, sales have significantly increased in New York City. While \$1.3 billion in hotel value was traded through December 2024, sales volume grew 60% to \$2.1 billion through December 2025. The uptick in activity has revealed notable trends: hotel trade has remained concentrated on hotels in the upscale to luxury classes, with a slight shift down-market.

Through December 2024, the trade of luxury and upper upscale hotels accounted for 70% of total sales volume, while the trade of upscale hotels accounted for only 11%. During the same period in 2025, transactions involving luxury and upper upscale hotels accounted for 57% of the total sales volume, while upper-upscale hotels now account for 30% of transactions. As of December 2025, examples of this trend include Magna Hospitality's purchase of a four-property portfolio, inclusive of 374-room Motto by Hilton New York City Chelsea, the 196-room Hilton Garden Inn New York Times Square North, the 320-room DoubleTree by Hilton New York Times Square, and the 239-room Fairfield by Marriott Inn & Suites New York for a total of \$489.8 million.

Although investor interest in upscale hotels in the market has increased through December 2025, transaction activity remains dominated by investor appetite for luxury and upper upscale hotels. For example, several notable luxury hotels have traded in the past few months.

The sale of the 271-room New York EDITION in 2025 for \$235 million, or roughly \$867,000 per key, represents the highest-valued single-asset transaction in over a year. California-based Kam San Company purchased the luxury hotel from Abu Dhabi Investment Authority. Additionally, the 276-room The Dominick was sold for \$174 million in 2025, or roughly \$630,000 per key. The luxury condo hotel was purchased by London-based Cain International from CIM Group, yielding a capitalization rate of 5.5%. Lastly, one of the largest trades to occur this year was the sale of the 292-room Kimpton Hotel Eventi. The hotel, located in the Chelsea neighborhood of the Midtown South submarket, sold for \$174.5 million, or \$597,000 per key. The buyer, BRE Hotels & Resorts, a Blackstone portfolio Company, acquired the property from DLJ Real Estate Capital Partners in a transaction that closed in May 2025.

Looking ahead, industry participants anticipate the acceleration in investment volume in the closing months of 2025 to continue, driven by loosening credit conditions and expectations of further rate cuts by the Federal Reserve. Deal flow is being driven by a mix of local, national, and international players, and the observed trends are expected to continue in the near term. Local and national players are expected to continue dominating transaction activity, with interest in higher-end properties remaining pronounced. Meanwhile, interest in upscale hotels continues to grow.

The New York City market encompasses an area comprising 10 submarkets, which include the city's five boroughs: Manhattan, Brooklyn, Queens, the Bronx, and Staten Island. As the largest city in the U.S. with a population of over 8.4 million, New York is a popular destination known as the country's premier financial hub. The market boasts some of the world's most frequently visited tourist attractions and features an iconic skyline, courtesy of its high concentration of skyscrapers.

According to Tourism Economics, New York City's total domestic and inbound travel expenditure exceeded \$56.2 billion in 2024, up 8.3 % from \$51.9 billion in 2023. Most importantly, travel expenditure has increased at a compound annual growth rate of 3.7% since 2019. Meanwhile, domestic and international visits to the market increased from 33.9 million in 2023 to 36 million in 2024, representing a 6.2% rise. However, visitation to the New York City market has yet to surpass pre-COVID levels and is currently 6% below 2019 levels.

The New York City hospitality market is supported by various economic drivers that generate demand for hotel rooms across all segments. As the nation's preeminent financial hub, business transient and weekday demand are driven by Wall Street, the New York Stock Exchange (NYSE), banking and law firm corporate headquarters, and the high density of Class A office buildings that attract businesses and business travelers alike.

Group demand is also pronounced in New York. Driven by the largest convention center in the market, the Javits

Center, which is in the Midtown South submarket. The 3.3 million-square-foot facility completed a 1.2 million-square-foot expansion in May 2021, which is anticipated to generate an additional 200,000 room nights per year, according to The New York Convention Center Operating Corporation. While group demand in the market remains strong throughout the year, it typically peaks in September, coinciding with the UN General Assembly.

The presence of heavily visited leisure demand generators complements the hotel demand generated by business and group travel. Tourist attractions such as Times Square, Central Park, the Empire State Building, the 9/11 Memorial & Museum, the Metropolitan Museum of Art, Madison Square Garden, Yankee Stadium, Broadway, Rockefeller Center, and the Statue of Liberty offer leisure travelers a diverse range of options throughout the year. Additionally, the city's globally recognized restaurants and nightlife, coupled with vibrant neighborhoods such as the Village, Williamsburg, DUMBO, and Astoria, further enhance New York City's appeal to travelers. Given the high volume of domestic and international travelers frequenting these sites and locales, these attractions drive demand on both weekends and weekdays.

It is worth noting that owners and operators are preparing for the renegotiation of union contracts in 2026. Most importantly, since the unions played a pivotal role in pushing through short-term rental and zoning regulations, they will likely have strong expectations regarding their bargaining position.
